

Recurring API Information:

To utilize recurring billing through the API, you must first create a plan using the Merchant Control Panel under the “Add Plan” menu. Once you have created a plan and set a plan **SKU**, you can then associate a customer with a plan by passing the plan SKU through the API.

Important New Variables:

Variable Name	Required*	Format	Description
type	Required	add_recurring	add_recurring = Association information with plan SKU
		delete_recurring	delete_recurring = Remove recurring subscription
start_date	<i>Optional</i>	YYYYMMDD	ie. 20120625 (June 25 th , 2012)

Example “association” Request using plan “monthly”:

https://secure.durango-direct.com/api/transact.php?username=durango&password=test1234&cc_number=4111111111111111&cc_exp=1012&type=add_recurring&start_date=20120625&product_sku_1=monthly

Example Response:

response=1&responsetext=Recurring added&authcode=&transactionid=995147927&avsresponse=&cvvresponse=&orderid=&type=add_recurring&response_code=100

In the response, you will receive a transaction id# that is necessary for deleting a customer using the delete_customer command via the API.

Example Deletion Request (new variables highlighted):

https://secure.durango-direct.com/api/transact.php?username=durango&password=test1234&delete_recurring=995147927

Example Response:

response=1&responsetext=Recurring Transaction Deleted&authcode=&transactionid=0&avsresponse=&cvvresponse=&orderid=&type=&response_code=100
