

# SwIPe

## Simplified.

### Introducing SwIPe – A More Efficient – Safer Transaction

SWIPE is a Windows® based software for card-present transactions.

It utilizes unlimited storage capabilities of the payment gateway, and the security features of a next generation card reader with signature capture.

#### KEY FEATURES AND BENEFITS

##### Record Retrieval

Immediately locate signed receipts stored in the gateway.

##### Signature Capture

Fight disputes with chargeback representation.

##### Useful Data

Store up to 20 merchant defined fields in the Customer Vault for future business.

##### E-mail Receipts

Automatically e-mail receipts to customers.

##### Enhanced Security

Encrypted end-to-end PED compliant security protects cardholders against breach.

##### Green Initiative

Paperless receipts save trees and the environment.

##### Cost Efficient

Save money by paying lower card present rates.

*Easy as  
1, 2, 3.*
